

LIMIT-PRO

RANGE LIMITING DEVICE FOR MOBILE CRANE

More precise operations, better equipment protection and a superior operator experience, achieved through progressive and fully programmable slowdown.

Limit-Pro improves the motion control of your mobile crane and delivers smooth, controlled stops thanks to a system that automatically

reduces the movement speed as the equipment gradually approaches a protected zone.

Progressive motion control

Automatic slowdown as you approach programmed zones, for a smooth and controlled stop.

Configurable work zones

Define your work zones to match your jobsite and its obstacles.

Reduced impacts and wear

Fewer impacts and reduced stress on the structure, the components and the load.

LIMIT-PRO

RANGE LIMITING DEVICE FOR MOBILE CRANE

KEY FEATURES

- 1 Simple, fast zone configuration** to match the specific needs of your jobsite.
- 2 Main boom angle displayed on screen**, providing real-time information for precise control.
- 3 Ground view that tracks your movements in real time** for more intuitive operation.
- 4 Clear on-screen display of programmed zones** near obstacles and structures.

PROGRAMMABLE ZONES
Define your work perimeters based on your site constraints and obstacles.

PROGRESSIVE CONTROL
Automatic, proportional slowdown delivering a smooth and controlled stop.

EQUIPMENT AND STRUCTURE PROTECTION
Lower risk of contact, fewer impacts and a longer overall service life for your equipment.

OPERATIONAL COMPLIANCE
Designed to meet the safety requirements of the industry.
