Technology Solutions

GRYB CONSTRUCTION

AERIAL/ELEVATING WORK PLATFORM

The e-Trak solution for aerial work platforms helps operators work within predefined limits. The system monitors platform movement in real time and can restrict or stop motion when a limit is reached.

Optional: a camera system can also be added to improve visibility around the equipment.

Telescopic boom lift

Articulating boom lift

MORE CONTROL
Limits tailored to the work environment.

MORE VISIBILITY
Fewer blind spots with optional cameras.

MORE PREVENTION
Helps reduce the risk of collision, pinching and contact with obstacles.

RETROFIT INSTALLATION
Can be added to existing equipment, subject to technical validation.

AERIAL/ELEVATING WORK PLATFORM

KEY FEATURES

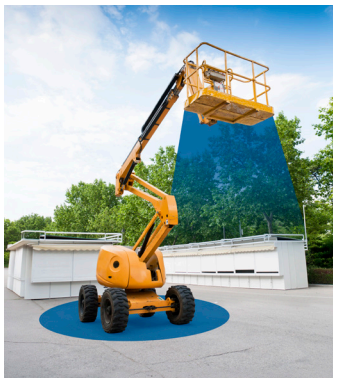

1 REAL-TIME MOTION CONTROL
Restricts or stops a motion when a preset limit is reached.

2 OPERATOR ALERTS
Visual and audible alerts so the operator can react quickly.

3 ADAPTABLE SETTINGS
Configured to the equipment and its environment.

4 INTUITIVE INTERFACE
Clear display of key information to support faster decisions.

5 OPTIONAL CAMERAS
Improve visibility in blind spots and help detect people or obstacles around the equipment.

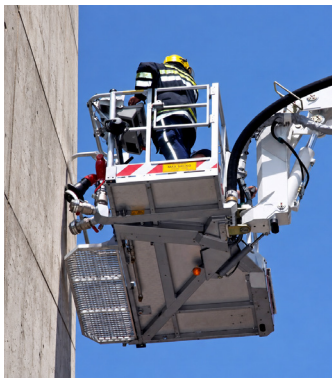

360° visibility
Optional cameras for full coverage around the machine.

Working near obstacles
Movement limits set to match the environment.

Working at height
Set a maximum working height.

Working safely
Less equipment damage, less downtime and lower incident costs.
